

Ideation Phase

Brainstorm & Idea Prioritization Template

Date	30 September 2026
Team ID	SWTID-2026-7065
Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Brainstorm & idea prioritization

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

🕒 10 minutes to prepare
🕒 1 hour to collaborate
👤 2-8 people recommended

➔

Before you collaborate

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

🕒 10 minutes

A Team gathering
Define who should participate in the session and send an invite. Share relevant information or pre-work ahead.

B Set the goal
Think about the problem you'll be focusing on solving in the brainstorming session.

C Learn how to use the facilitation tools
Use the Facilitation Superpowers to run a happy and productive session.

1

Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

🕒 5 minutes

PROBLEM

How might we automatically classify school IT tickets at creation to reduce manual effort and improve routing?

Key rules of brainstorming

To run a smooth and productive session

- Stay in topic.
- Defer judgment.
- Go for volume.
- Encourage wild ideas.
- Listen to others.
- If possible, be visual.

Step-2: Brainstorm, Idea Listing and Grouping

2
Brainstorm
Write down any ideas that come to mind that address your problem statement.
10 minutes

Tip: You can select a sticky note and hit the pencil (switch to sketch) icon to start drawing!

Kirubakaran S

Auto classify tickets	Keyword match	WiFi → Network
Passive → Active	Password → Access	Slow PC → Perf.

Dinesh B

Email to caller	No-code Flow Designer	Trigger: Category is empty
Update Category + Subcat.	Test: WiFi ticket	

Sadashakrishnan R S

Reduce manual effort	Faster routing	Easy to maintain

Vijay Raghavan S

Update Set	Export XML	Future: SLA

Raghu H

send email	email message	self test
projector test	check email	

3
Group ideas
Take turns sharing your ideas while clustering similar or related notes as you go. In the last 10 minutes, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you can break it up into smaller sub-groups.
20 minutes

Tip: Add customisable tags to sticky notes to make it easier to find, browse, export, and categorise important ideas as themes within your board.

Vijay Raghavan S

Identify the issue type from Short Description keywords

WiFi / Network	Projector
Password / Login	Slow / Hanging

Update Category and Subcategory automatically

Network > Wi-Fi	Hardware > Projector
Access > Forgot Password	Performance > Slow Computer

Confirm submission to the caller by email

Confirmation email sent	Caller notified of submission
Sent after classification	

Build it no-code and keep it maintainable

Flow Designer	No-code automation
Update Set (export XML)	

Step-3: Idea Prioritization

4
Prioritize
Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.
20 minutes

Importance
If each of these tasks could get done without any difficulty or cost, which would have the most positive impact?

Feasibility
Regardless of their importance, which tasks are more feasible than others? (Cost, time, effort, complexity etc.)

Tip: Participants can use their cursors to point at where sticky notes should go on the grid. The facilitator can confirm the spot by using the laser pointer holding the H key on the keyboard.

Sticky notes placed on the grid:

- Predictive intel. (future)
- SLA track (future)
- Assignment auto (future)
- No-code Flow Designer
- Update Set deploy
- Keyword auto-classify
- Email to caller
